

CONTENTS

1.	GENERAL POINTS	7
1.1.	SCOPE OF APPLICATION.....	7
1.2.	TERMINOLOGY.....	8
1.3.	REFERENCE STANDARDS AND RULES.....	12
2.	CHOOSING THE RIGHT ALARM RECEIVING CENTRE (ARC)	14
2.1.	THE DECISION SUPPORT LOGICAL DIAGRAM.....	14
2.2.	THE ARC CONTRACT.....	16
2.3.	TYPOLOGY OF ARCS.....	17
3.	FUNCTIONAL REQUIREMENTS FOR ALARM RECEIVING CENTRES	18
3.1.	MINIMUM FUNCTION MODULES.....	18
3.1.1	Routing module (module A).....	19
3.1.2	Reception module (module R).....	19
3.1.3	Processing module (module T).....	19
3.1.4	Operational module (module E).....	19
3.1.5	Operator module (module O).....	20
3.1.6	Administrative management module (module G).....	20
4.	ORGANISATIONAL REQUIREMENTS FOR ALARM RECEIVING CENTRES	22
4.1.	GENERAL POINTS.....	22
4.2.	MODULE NETWORKS.....	22
4.3.	INTER-MODULE TRANSMISSION PATHS.....	22
4.4.	NUMBER OF OPERATORS.....	23
5.	SAFETY REQUIREMENTS FOR ALARM RECEIVING CENTRES	24
5.1.	GENERAL LOCATION.....	24
5.2.	SECURED SHELL.....	24
5.2.1	Physical safety.....	24
5.2.2	Air conditioning.....	25
5.2.3	Protection against toxic or irritants agents.....	25
5.2.4	Facilities for surveillance of approach and intrusion.....	26

5.3.	ANCILLARY LOCATION NOT INCLUDED IN THE SECURED SHELL OF THE ARC.....	27
5.3.1	Physical safety.....	27
5.3.2	Air conditioning	27
5.3.3	Protection against toxic or irritants agents	27
5.3.4	Facilities for surveillance of approach and intrusion.....	27
5.4.	LOCATION HOUSING ONE OR SEVERAL COMPLEMENTARY OPERATOR MODULES NOT INCLUDED IN THE SECURED SHELL.....	28
5.4.1	Physical safety.....	28
5.4.2	Air conditioning	28
5.4.3	Protection against toxic or irritants agents	28
5.4.4	Facilities for surveillance of approach and intrusion.....	29
5.5.	FIRE SAFETY	29
5.6.	ELECTRICAL INSTALLATION SAFETY	30
5.7.	SAFETY IN TERMS OF SPECIFIC RISKS	30
5.7.1	Lightning	30
5.7.2	Flooding.....	30
5.7.3	Total failure of wire transmission liaisons.....	30
5.7.4	Operator vigilance control system	30
5.7.5	Emergency call system.....	31
5.7.6	Safety transmission path	31
6.	POWER SOURCE REQUIREMENTS FOR ALARM RECEIVING CENTRES	32
6.1.	GENERAL POINTS.....	32
6.2.	MAIN POWER SOURCE	32
6.3.	SECONDARY POWER SOURCE	32
6.3.1	Description	32
6.3.2	Autonomy.....	33
6.4.	TRANSFER POWER SOURCES	34
6.5.	CASES WHERE THE USE OF SECONDARY AND TRANSFER POWER SOURCES IS NOT LIMITED TO ALARM RECEIVING ACTIVITY.....	35
6.6.	SAFETY LIGHTING	35
6.7.	PHYSICAL AND ELECTRIC PROTECTION OF POWER SOURCE LINES	35
7.	TRANSMISSION REQUIREMENTS FOR ALARM RECEIVING CENTRES	36
7.1.	GENERAL POINTS.....	36
7.2.	TRANSMISSION LEVEL REQUIREMENTS	36
7.3.	CHOICE OF TRANSMISSION LEVEL	36
7.4.	DIMENSION OF THE NETWORK	38
7.4.1	Reception equipment.....	38
7.4.2	Protection of wire connections	38
7.4.3	Protection of Hertzian connections	38

7.5.	PROCESSING OF MESSAGES	38
7.6.	RECORDINGS.....	39
7.6.1	Traceability of information on physical media.....	39
7.6.2	Tolerance and matching of time stamping.....	39
7.6.3	Time stamped recording of telephone calls and content of voice messages	40
8.	REQUIREMENTS FOR STAND-BY ALARM RECEIVING CENTRES	41
8.1.	STAND-BY ALARM RECEIVING CENTRE AND CONTINUITY OF SERVICE.....	41
8.2.	CASE OF A STAND-BY ALARM RECEIVING CENTRE IN OVERFLOW.....	42
8.3.	CASE OF A STAND-BY ALARM RECEIVING CENTRE IN CLEARANCE	42
8.4.	CASE OF A STAND-BY ALARM RECEIVING CENTRE IN TOTAL MIRROR	42
9.	PROCEDURES	43
9.1.	SAFETY PROCEDURES	43
9.2.	OPERATION PROCEDURES	43
9.3.	CONNECTION PROCEDURES.....	44
9.4.	MAINTENANCE PROCEDURES	44
9.5.	REMOTE MAINTENANCE PROCEDURES FOR MONITORED SITES.....	45
	APPENDIX 1- Complementary requirements established in collaboration with the Prevention bodies of the French Federation of Insurance Companies	46
	APPENDIX 2 - Declaration of conformity N31	49
	APPENDIX 3 - Example of network architecture	52
	APPENDIX 4 - Criteria for assessment of non A2P certified door assemblies	54
